Mission of MSU-CIBER

To provide world-class education, research, and assistance to businesses on issues of importance to international trade and global competitiveness.
Objectives of MSU-CIBER

• **Objective 1: Knowledge Creation**
  – To carry out research that generates best-practice knowledge on global business operations and global competitiveness.

• **Objective 2: Learning Materials and Programs**
  – To offer professional development and academic programs on contemporary international business techniques, strategies, and methodologies.

• **Objective 3: Dissemination and Outreach Activities**
  – To provide innovative, technology-driven dissemination of international business knowledge to business executives, public policy makers, scholars, and students.
For each of the ten initiatives, two to fourteen specific activities are strategically designed for each initiative to achieve one of the three objectives as outlined in the figure above (please see “MSU-CIBER Activities 2002-2006” for a detailed discussion of each activity).

MSU-CIBER and Its Alignment with the Broad College

“...The vision and accompanying strategic elements of the MSU-CIBER Strategic Plan 2002-2006 aligns closely with the Strategic Plan of the Broad Business College (dated September 17, 1999) for maximum impact. The Strategic Plan of the Broad Business College emphasizes four basic themes: (1) Positioning (e.g., enhancing the Broad Business College’s reputation and solidifying its resource base), (2) Core Businesses (e.g., undergraduate, graduate, and executive education), (3) Technology (e.g., a Broad Business College “culture, capacity, and technical knowledge base competitive with peer schools to service planned educational programs and systems”), and (4) Alignment (e.g., organization of the units in the Broad Business College to stress core competencies and global competitiveness).”
“The vision and accompanying strategic elements of MSU-CIBER Strategic Plan 2002-2006 also aligns closely with The MSU Promise (dated December 9, 1999) and The MSU Guiding Principles (dated February 15, 1994) to achieve maximum impact. The values inherent in this framework (educational excellence, the scholarly quest for knowledge, academic freedom, integrity, creativity, fairness, and respect) also align well with MSU-CIBER’s Guiding Principles (see section on “MSU-CIBER Ten Guiding Principles” in this document). Similarly, the five university goals outlined in The MSU Promise and Guiding Principles align very well with the focus of the MSU-CIBER (i.e., provide leading-edge undergraduate education, focus on programs of distinctive promise to extend international prominence, be a great global university serving Michigan and the world, transform and strengthen outreach partnerships, and be a diverse and connected community).”

COUNTRY INSIGHTS

Spain. Since becoming a democracy in 1975, Spain has evolved to become the fifth largest economy in the EU. It has been able to attain and retain this position despite the continuous threats of domestic ETA and new foreign (Al-Qaeda) terrorism. However, it’s political – and consequently, economic - future is again under international scrutiny.

The fallout from the March 11, 2004 bombings of commuter trains in Madrid forced Spain into the international spotlight. Many people cite the bombings as the main contributing factor to the election of a socialist Prime Minister, Mr. José Luis Rodríguez Zapatero. The election of a socialist administration represents a dramatic shift from the democratic political system that has supported Spain’s growth as a major economic player in the EU. Because of the new administration, many of Spain’s prior political and economic policies are now under review. Nowhere is this more evident than by the removal of Spanish troops from the multinational coalition currently occupying Iraq. Some view this move as Spain shifting closer to its traditional allies, France and Germany, thereby shifting the balance of power inside the European Union. Others see Spain as gaining international influence, as their new Iraq policy has led countries outside of the EU to also withdraw their troops from the coalition.
